

Cynthia L. McLean retired from the FAA in 2016. She was Human Factors Research Scientist for FAA Cabin Safety Research for over 17 years. She has BA and MA degrees in Experimental Psychology, with emphasis in human factors, research design, and statistics. Her research has included: behavioral techniques for emergency aircraft evacuations with infants, aircraft passenger safety awareness, and comprehensibility of briefing card pictograms and safety symbols. Cynthia is also Chair of the SAE International S-9 Cabin Safety Provisions Technical Committee, which addresses all facets of aircraft cabin safety and is dedicated to creating, preparing, and maintaining all relevant specifications, standards, and requirements for cabin safety systems.
