

Michael Walz has been working as FAA electrical systems program manager for over 16 years. He has worked on two aviation rule making committees and many industry standard working groups; mainly SAE aerospace Electrical systems, circuit protection and wiring. Before coming to the FAA he worked in industry for over 23 years as a design engineer. Mike enjoys working in the lab with new technology to discover its safety implications. In other words, he likes breaking things so they don't break on the aircraft.
