

Casey Brantner
Boeing

Casey graduated from the University of Michigan in 2019 with a Bachelor's in Chemical Engineering. She received her Master's in 2020 from the University of Washington in Materials Science and Engineering. Casey joined Boeing in 2019 and is currently working as a Materials, Process, and Physics engineer in Huntsville, Alabama. Her achievements include retesting adhesives for production use, completing fluid fills for flight hardware in a clean room environment, and creating custom cryogenic tests to evaluate space components down to -423°F. Casey also participated in the Boeing Engineering Career Foundation Program where she worked in 767 factory support, chemical technology, solar cell wafer fabrication, and AvionX power and embedded controls; giving her valuable insights into Boeing and its products. In her free time, Casey enjoys skiing, hiking, and walking her dog.
