

Dr. San-Mou Jeng

Dr. Jeng was a full professor at the University of Cincinnati for over 27 years. He has established a well-equipped laboratory for research, test and evaluation of gas turbine combustion and aviation fire safety. The research foci of the laboratory are low emissions gas turbine combustion, liquid fuel atomization, air/fuel mixing, fuel lean ignition and blow out limit, combustion dynamics, high altitude relight, alternative fuel combustion, fuel thermal stability and fuel injectors and advanced optical diagnostics.
