

David Lee

Senior Vice President
Engineering, IT and Special Projects
Satco, Inc.

Prior to joining Satco, I retired from FedEx Express after 32+ years holding various leadership positions in aircraft ground operations, flight and ground operations safety, spending my last several years as the Global Manager over the airline ULD fleet responsible for the design development, purchasing, maintenance repair and balancing globally. After retiring from FedEx Express, I was given the opportunity to join Satco, Inc., a leader in aircraft ULD manufacturing, assembly and repair networks. Satco is dedicated to developing the safest possible ULDs for both cargo and flight safety and I have the unique opportunity to bring aviation operations experience to the vendor / supplier industry.
