

Bryan Moran is the Clean Airplane Program Leader for the Boeing Confident Travel Initiative. He works closely with Airlines, Suppliers, Regulators, and Industry Committees to develop cleaning and disinfection guidelines for aircraft interiors. Bryan led the development of the detailed Boeing guidance document to disinfect aircraft for SARS-CoV-2. He also helped lead the first of its kind live virus testing on an aircraft in 2020 during the pandemic. Bryan was a key contributor to the RTCA DO-388 Guidance Document on Aircraft Cleaning and Disinfection.

In addition to his Confident Travel Initiative role, Bryan is also an Interiors Engineering Senior Manager on the Boeing 777X Program. Bryan started at Boeing in 2001 and enjoys working together with great people on complex projects. He has a Mechanical Engineering degree from the University of Washington and an MBA from Seattle University. Outside of work he enjoys spending time with family and coaching his daughters' softball and soccer teams.
