

Dan Ziegler
MACRO Industries, Inc.

Dan Ziegler has spent nearly 20-years in aircraft survivability-related fields, first as a vulnerability engineer with Boeing Space & Defense and engineering manager with Boeing Commercial Airplanes on composite structural design packages. In 2010, he moved from large system integration to subsystem hardware design, when he joined MACRO Industries, a company that has worked with the US Gov't and the world's leading airlines to develop and field thousands of composite armor systems and fire-resistant structures for commercial, eVTOL, and DoD aircraft. Dan/MACRO are currently involved in testing next-generation fire-resistant materials for commercial aircraft and electric vehicle battery containment systems and are members of several DoD and SAE committees related to aircraft safety and survivability.
