

# Halon Purity Certification Methods

**Richard Hill**

**Program Manager, Fire Safety Team**

FAA Wm. J. Hughes Technical Center

Atlantic City International Airport, NJ 08405

**Federal Aviation  
Administration**

# Purpose

***Investigate Approval and Quality Control  
Issues for Fire Extinguishing and Suppression  
agents***

# Background

- **A situation recently arose where fire extinguishing agent was not supplied to the required quality standards, with potentially severe implications for flight safety.**
- **A situation recently arose where fire extinguishing agent was not supplied to the required quality standards, with potentially severe implications for flight safety.**

# Task Specification

- **A worldwide review of current processes associated with the approval for media associated with the extinguishment/suppression of fire on aircraft is required.**
- **Areas of potential improvement should be identified from the point of view of increasing product quality assurance but also for minimising regulatory burden. The deliverable is to be a report at the conclusion of the work.**
