

# Storage of E-Tablets in galley compartments and the flight deck

Federal Aviation  
Administration

Presented to: Systems Meeting

By: Thomas Maloney, FAA Fire Safety

Date: 10-29-2014

# Background

- **There is use of E-Tablets as an airline supplied personal entertainment device aboard passenger aircraft.**
  - Tests were previously carried out with CAAS which showed the risk of an e-tablet fire within a galley cart (see presentation 22 from 5/14/2014 systems meeting).
- **E-Tablets are used by flight attendants and pilots.**

# Recent Tests

- **Preliminary tests were conducted with CAAS to demonstrate the risk of e-tablet fires in aircraft *galley compartments* and the *flight deck*.**

# Future Work

- **Run further tests in the flight deck with magnesium alloy e-tablets.**
- **Develop methods of handling an e-tablet fire in the flight deck.**
